ANNOUNCEMENT OF CLOSED SESSION
EXECUTIVE DIRECTOR’S UPDATE
COVERED CALIFORNIA BOARD 2021 MEETING DATES

All meetings will be held at Covered CA Headquarters, 1601 Exposition Boulevard, Sacramento. Depending on social distancing and emergency rules regarding how meetings are held during the pandemic, we are planning for meetings to be virtual through the end of 2020 and likely well into 2021. Unless otherwise notified, meetings will begin at 10:00 am and are held the third Thursday of the month.

2020 CALENDAR YEAR ENROLLMENT
NEW ENROLLMENT – 2020 SPECIAL ENROLLMENT + 2021 OPEN ENROLLMENT

As of Dec 31, 2020, 541,000 signed up between special enrollment in 2020 and those newly signing up during the current open enrollment period — the largest figure for new sign-ups since the end of a preceding open-enrollment period in Covered California’s history.

There has seen a steady increase in the diversity from new consumers who sign up during special and open enrollment.

66 percent enrolled represent communities of color, an increase from 60 percent in 2015.
Latest enrollment data also highlights Covered California’s critical role in helping low-income Californians — those hardest hit by the COVID-19 pandemic — get access to necessary health care.
To request to make a comment, press 10; you will hear a tone indicating you are in the queue for comment. Please wait until the operator has introduced you before you make your comments.

If watching via the live webcast, please mute your computer to eliminate audio feedback while calling in. Note, there is a delay in the webcast.

The call-in instructions can also be found on page two of the Agenda.

**EACH CALLER WILL BE LIMITED TO TWO MINUTES PER AGENDA ITEM**

COVERED CALIFORNIA
DATA & RESEARCH
2020 PROJECT OVERVIEW
Covered California’s in-house Data & Research efforts span a range of areas, including partnership among internal Divisions and with vendors and outside collaborators.

Key themes in our work include:

- Making data available to the public
- Performing focused analyses of emerging policy issues
- Surveying our members
- Evaluating program operations
- Conducting rigorous analysis for policymakers and the research community

What follows are several examples of the data and research efforts underway in 2020.

Note – some of these analysis have previously been presented to the Board, while others are new, and presented only as a sampling of the daily work occurring at the organization to ensure all our decisions are guided by the best available evidence.
MAKING DATA AVAILABLE TO THE PUBLIC
MAKING DATA AVAILABLE TO THE PUBLIC

Transparency is a core value for Covered California, and making regular, detailed data available about the program is a key priority. Key 2020 efforts included:

- **Regular releases of enrollment profiles** with data by demographics, income, and plan choice and subsidies at [https://hbex.coveredca.com/data-research/](https://hbex.coveredca.com/data-research/).

- **2020 SEP Plan Selection Profile** – providing detailed demographics on the population enrolling during the pandemic, with comparison to 2019.

- **State Subsidy Analysis and Reporting** – Enhanced quarterly enrollee snapshot to include state subsidy-specific categories and metrics. Additionally, a new report detailing new key metrics about the program is forthcoming in January 2021 (pursuant to AB 174).
FOCUSED ANALYSES OF EMERGING POLICY ISSUES
FOCUSED ANALYSES OF EMERGING POLICY ISSUES

Wherever possible, Covered California seeks to inform its policy and operations with the best evidence on critical issues that will impact our consumers.

Key examples from 2020 included:

- Risk profiling of new Special Enrollment Period (SEP) enrollees to inform Qualified Health Plan (QHP) re-certifications
- Tracking income changes and member exits during the recession
AGENCY COLLABORATION ENABLES RISK PROFILING, RESULTING IN BETTER RATES FOR CONSUMERS

By partnering with the Office of Statewide Health Planning and Development (OSHPD), and leveraging the California Health and Human Services innovative approach to data sharing, we were able to provide timely insight into the risk mix of the COVID-19 SEP population just in time for the annual review of proposed rates during QHP re-certification for 2021.

Relative Risk Scores Among 2020 Plan Selections, by Sign-up Period

- **Renewal**: Plan Selection before March 20, 2020 (1.02), Plan Selection after March 20, 2020 (0.96)
- **Open Enrollment**: Plan Selection before March 20, 2020 (1.01), Plan Selection after March 20, 2020 (0.98)

Covered California 2020 Average

Source: Covered California administrative data.
By combining survey and administrative data, we were able to get an early read on the increased exits to Medi-Cal and un-insurance being prompted by the pandemic and recession.

FEWER LEAVE COVERED CALIFORNIA FOR JOB-BASED COVERAGE, AND MORE GO UNINSURED

- Far Fewer Leaving for Job-based Coverage – Exits to job-based coverage have dropped precipitously (54% in 2019 down to 14% in 2020)
- Large Growth in Transitions to Medi-Cal – As expected in a recession, as consumers lose employment and income, exits to Medi-Cal have more than doubled when compared to the rate in 2019.
- Far More Go to Be Uninsured – 24% report leaving to be uninsured, up from only 10% in 2018: even in a pandemic, affordability is an obstacle to maintaining coverage.

SURVEYING OUR MEMBERS
Covered California undertakes a comprehensive program of survey research to ensure our policies and operations are informed by rigorous evidence on consumer attitudes and experiences.

Surveys conducted in 2020 include:

- Consumer Brand Awareness Tracker (April 2020)
- Member Survey (April 2020)
- COVID-19 Impact Survey (May 2020)
- SEP Member Survey (July 2020)
- COVID-19 and Coverage Survey (November 2020)
MEMBER SURVEY 2020 – STATE SUBSIDY

The 2020 Member Survey was designed before the 2020 pandemic hit, and focused on learnings related to the new state subsidy program.

For example, among consumers over 400% Federal Poverty Level (FPL), the likelihood to recommend Covered California in 2020 was much higher if consumers were aware they were receiving financial help.

Net Promoter Score (NPS) is a score based on an 11 point scale asking “How likely is it that you would recommend Covered California to a friend or colleague?”
Our in-house SEP Member Survey provided quick turn-around assessment of how our members were responding to COVID-19, along with profiling the new SEP cohort.

**HOW WOULD YOU BEST DESCRIBE THE CHANGE TO YOUR HOUSEHOLD’S INCOME SINCE FEBRUARY 2020?**

- **Lost only source of income**
  - 27% OE/Renewal
  - 32% SEP before 3/20
  - 43% SEP after 3/20
  - The COVID SEP cohort reports highest rates of having lost their only source of income.

- **Decrease in income**
  - 67% OE/Renewal
  - 60% SEP before 3/20
  - 51% SEP after 3/20
  - The majority of individuals report a decrease in their income since February.

- **Increase in income**
  - 6% OE/Renewal
  - 8% SEP before 3/20
  - 6% SEP after 3/20
  - Among those who experienced a change in income.
EVALUATING PROGRAM OPERATIONS
Covered California strives to implement policies effectively. Where possible, we implement trials and rigorous evaluations to build a cycle of continuous improvement.

Two examples from 2020 include:

- Partnering with Franchise Tax Board to test “penalty” messages.
- Email reminders to update consent and retain subsidy eligibility.
Covered California partnered with the Franchise Tax Board to send mailers to consumers alerting them about the new state mandate penalty, and testing which agency identity on the envelope would lead to higher response rates.

**DIRECT MAIL TEST RESULTS**

<table>
<thead>
<tr>
<th></th>
<th>Test 1 (OE)</th>
<th>Test 2 (SE)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>What was measured</strong></td>
<td>Effects of DM on health insurance take-up via A/B hold back test</td>
<td>Effects of envelope branding (CC vs. FTB) on health insurance take-up via A/B envelop test</td>
</tr>
<tr>
<td><strong>Findings</strong></td>
<td>Sending two letters to likely uninsured Californians during Open Enrollment significantly increased take-up and was a cost-effective means of customer acquisition Incremental effect: 0.36% increase in take-up resulting in 3,941 plan selections @ $335 each</td>
<td>The CC- and FTB-branded envelopes yielded a statistically equivalent take-up rate. However, FTB envelope generated a 53% higher call volume.</td>
</tr>
<tr>
<td><strong>Next steps</strong></td>
<td>Continue to include direct mail as part of our channel mix to reach consumers</td>
<td>Examine spillover to Medi-Cal</td>
</tr>
</tbody>
</table>
Covered California Policy and Marketing teams partner to identify the most effective messaging across a range of calls to action.

Each fall, consumers must update their consent for verification of their application information, or be at risk of losing their tax credits upon renewal.

This year, in a rigorously designed test, we learned that a third email does, in fact, significantly increase consumer response.
CONDUCTING RIGOROUS ANALYSIS FOR POLICYMAKERS AND THE RESEARCH COMMUNITY
CONDUCTING RIGOROUS ANALYSIS FOR POLICYMAKERS AND THE RESEARCH COMMUNITY

Covered California continues to prepare results for policymakers, including to collaborate with key academic partners (UCLA, Harvard)

- Early estimates of possible premium impacts from COVID-19
- The impact of state subsidies
- Responding to COVID-19: churn and SEP in the marketplace
- Impact of personalized telephone outreach on take-up
- Using emails and letters to reduce choice errors
EARLY ANALYSIS OF POTENTIAL COVID-19 PREMIUM IMPACTS

Led by Chief Actuary John Bertko, Covered California provided an early assessment of the potential impact of COVID-19 to premiums.

While the data on deferred and delayed care that eventually emerged offset the costs in many markets, the analysis helped spark the conversation of appropriate policy to cover these costs at a critical juncture in rate-setting for 2021.
Analysis of the new state subsidies showed their dramatic impact for those earning between 400% and 600% of FPL, and also revealed the need to encourage off-exchange enrollees to fully explore their options to potentially benefit from new financial help.

EFFECT OF STATE SUBSIDY PROGRAM

- By addressing the subsidy cliff at 400 percent FPL, California’s state subsidy program dramatically narrowed post-subsidy (or net) premiums for those above and below the cliff. In 2019—the year prior to the state subsidy program’s launch—enrollees just above 400 percent FPL paid an average of $429 per member per month (PMPM), while in 2020, enrollees just above 400 percent FPL paid an average of $306 PMPM, a 28 percent reduction in average premium costs.
Thanks to Covered California’s member survey, we are able to document churn in a comprehensive way, helping to remind policymakers of the importance of the marketplace as a part of the fabric of coverage.

Figure 1. Membership Tenure among New Enrollee Cohorts, by Year

2014 Cohort (First Cohort)
- 0-1 yrs: 41%
- 1-2 yrs: 22%
- 2-3 yrs: 11%
- 3-4 yrs: 7%
- 4-5 yrs: 5%
- 5-6 yrs: 4%
- Still enrolled: 11%

2015 New Cohort
- 0-1 yrs: 45%
- 1-2 yrs: 22%
- 2-3 yrs: 11%

- 1-2 yrs: 4%
- 2-3 yrs: 59%

2014 n=1,204,994; 2015 n=719,016; 2016 n=620,118; 2017 n=530,744; 2018 n=552,326; 2019 n=456,946; includes all subsidized members with continuous enrollment that began at some point during the year in question. A member was considered “still enrolled” if they were an effectuated member in January 2020 as part of a single, continuous coverage period that began in the year in question.

Part of a poster presented at AcademyHealth 2020 Annual Research Meeting.
CALIFORNIA AS A PROVING GROUND ON COVID-19 SPECIAL ENROLLMENT PERIOD

California both implemented a COVID-19-related qualifying life event, and engaged in an aggressive outreach and marketing campaign to help consumer know that they might qualify.

By comparing to the experience observed in the Federally-Facilitated Exchange (FFE), California offered a contrasting example ways marketplace administrators could respond to the pandemic.
PERSONALIZED OUTREACH IMPROVING TAKE-UP DURING OPEN ENROLLMENT

During Open Enrollment for 2019, the Service Center undertook an impressive effort to call consumers who had been found eligible, but not yet picked a plan.

From a rigorous evaluation undertaken in 2020, we are learning that it worked, and especially helped Spanish dominant and county-referred consumers.

Impacts of Phone Calls During Open Enrollment – Intent to Treat Effect

Being assigned to a call offering personalized assistance from Covered California:

- increased plan selection by 1.8 percentage points (12%); and
- increased effectuation by 1.3 percentage points (11%).
- Decrease in choice errors: the 0.5 percentage point decrease (-8%) was not statistically significant.

Presented at Association for Public Policy Analysis and Management (APPAM) 2020 Fall Research conference panel “Health Insurance Enrollment: Learning What Works from Randomized Evaluations with Federal and State Agencies.”
IMPROVING CHOICE QUALITY

We recently shared the results of a 2019 outreach effort designed to improve choice quality, encouraging Cost-Sharing Reduction (CSR) eligible consumers to take-up Enhanced Silver 87 and 94 plans with lower premium and better coverage, compared with Gold or Platinum equivalents (higher premium, worse coverage).

Presented at Association for Public Policy Analysis and Management (APPAM) 2020 Fall Research conference panel “Health Insurance Enrollment: Learning What Works from Randomized Evaluations with Federal and State Agencies.”

STATE AND FEDERAL POLICY / LEGISLATIVE UPDATE
On December 4, 2020 the Department of Health and Human Services (HHS) issued the proposed 2022 Benefit and Payment Parameters, the annual rule that makes a variety of changes for the upcoming plan year. Covered California offered the following comments:

- **FFE and SBE-FP User Fee:** The proposed user fee reduction appears to be a move to permanently and deliberately underfund and undercut the ability to effectively implement required functions of the FFE – or any Exchange. The goal of supporting the individual market should be lowering total premiums by fostering more enrollment and a healthier risk mix and making investments that pay off for American consumers.

- **New Marketplace Option:** Eliminating Exchanges operated by states or HHS as an enrollment option would remove a consistent source of standard information for consumers about health plan selection and eliminate consumer protections while allowing private brokers to promote non-ACA compliant products.
**Codifying 1332 Guidance:** Codifying the 2018 guidance that introduced new, less restrictive interpretations of the requirements to meet the statutory guardrails listed in section 1332 of the ACA would allow states to undercut consumer protections put in place by the ACA and prior guidance (2015), while encouraging cheaper, less-comprehensive non-ACA compliant products.

**Covered California Comments on the Proposed 2022 Benefit and Payment Parameters**
FEDERAL UPDATES

Coronavirus Response and Relief Supplemental Appropriations Act (H.R. 133) signed into law on Dec. 27

- **Supplemental federal pandemic unemployment benefits** at $300 weekly through Mar. 14
- **Direct payments** of $600 for individuals making up to $75K annually, $1,200 for couples making up to $150K annually
- **Provider Relief Fund** for one-time, one-year increase in Medicare physician fee schedule of 3.75%
- **Gag clause prohibition between providers and health plans** that prevent visibility into cost and quality data on providers
- **Broker compensation** requirements to disclose compensation to employers offering health insurance benefits and enrollees in the individual market
- **Health plan disclosure and tracking of prescription drug spending**
- **Provisions against surprise medical bills**
STATE UPDATES

The California Legislature commenced the 2021-22 legislative session in December. A few introduced bills of note are below. We will continue to track introduced and amended bills throughout the legislative session.

Medi-Cal Eligibility:

- **AB 4 (Arambula)** would grant full-scope Medi-Cal to anyone, regardless of age, who is otherwise eligible for those benefits but for their immigration status.
- **SB 56 (Durazo)** would, effective July 1, 2022, extend eligibility for full-scope Medi-Cal benefits to individuals who are 65 years of age or older, and who are otherwise eligible for those benefits but for their immigration status.

State Bodies: Meetings

- **AB 29 (Cooper)** would require that writings and materials connected to a discussion item in a noticed meeting be made available to the public 72 hours in advance of the meeting.
The Governor’s 2021 Budget was released on Friday, January 8.

- The budget preserves the Covered California health insurance subsidies for middle-income households enacted in the 2019 Budget Act by providing $405.6 million for state premium assistance for the 2022 plan year.

- Budget Bill Language requires the 2022 program design to align with the 2021 program design and allows the Board to make technical and conforming changes to the program design.
GOVERNOR’S BUDGET

- Proposes $600 stimulus payments to individuals under an immediate package.
- Provides $5.7 billion to respond directly to the COVID-19 pandemic, at least 75 percent of which will be reimbursed by the Federal Government.
- Reintroduces a $1.1 billion funding proposal for CalAIM.
- Proposes establishment of the Office of Healthcare Affordability to address provider consolidation, regional cost differences and cost targets for all sectors.
GOVERNOR’S BUDGET

- Appropriates $372 million to expedite the delivery of COVID-19 vaccinations.
- Establishes a Center for Data Insights and Innovation within the California Health and Human Services Agency (CHHSA).
- Introduces an initiative specifically addressing health equity will be laid out in the spring budget, including an initiative within the Department of Managed Health Care (DMHC) to address health plan quality in the area of health equity.
- Introduces an initiative to strengthen health information exchanges among health plans, hospitals, medical groups, testing laboratories, and nursing facilities.
To request to make a comment, press 10; you will hear a tone indicating you are in the queue for comment. Please wait until the operator has introduced you before you make your comments.

If watching via the live webcast, please mute your computer to eliminate audio feedback while calling in. Note, there is a delay in the webcast.

The call-in instructions can also be found on page two of the Agenda.

PRESENTATIONS FROM COVERED CALIFORNIA QUALIFIED HEALTH PLANS
HEARING FROM CONTRACTING HEALTH PLANS: ASSURING QUALITY CARE

Report on First Five Years: Improving Access, Affordability and Accountability – Major Findings:

- High levels of consumer satisfaction with their health plan and health care.
- Wide variation in performance among insurers with the exception of integrated delivery systems consistently performing in the top ten percent nationally.
- Strong performance by integrated delivery systems underscore potential for improvement and the importance of fostering care that is well-coordinated.
- Improvement in performance would be potentially life-saving and clinically meaningful for hundreds of thousands of Californians.
- Relatively low scores on some consumer-reported experience measures warrant further research and improvement across all insurers.
- Behavioral health presents a significant improvement opportunity.

Covered California’s First Five Years Report
HEALTH PLANS REQUESTED TO PRESENT ON FOUR STANDARD ISSUES

- Plan Overview
  - Membership description
  - Covered California as part of their proportion of overall products
- Current successes and challenges in Covered California
- COVID-19 responses
- What’s coming on the horizon?

CHINESE COMMUNITY HEALTH PLAN

Craig Reich, MD, Medical Director
Wil Yu, Chief Operating Officer
Covered California Board Meeting
1/14/2021
Chinese Community Health Plan (CCHP)
Medical Director
Craig A Reich, MD
Chinese Community Health Plan (CCHP)

Discriminatory practices against Chinese physicians resulted in CCHP
started to support the local Chinese physicians
San Francisco and northern San Mateo
Currently 16,000 members
Medicare 5,000 (2,500 Regular Medicare and 2,500 Dual SNP)
Covered California 9,000
Off Exchange 2,000
Health System

Provider Groups
- Jade – assigned about 60% of Commercial (capitation) and 10% of Medicare (FFS) members.
- Hill physicians assigned about 40% of Commercial members (capitated payment model).

Chinese Clinics
- 4 clinics with employed staff; 1 clinic at CH
- Contracted with many different insurances (including CCHP)

Chinese Hospital
- 54 bed in-patient
- SNF
Strengths

Small size
Language and culture
Member services – large volume of in-person services
Care coordination
Pharmacy-related measures. High adherence rates.
?cultural
Successes

Well managed utilization
Steerage to CH with favorable contracting
Above 90\textsuperscript{th} percentile for the following measures:

- Assuring patients with Diabetes receive appropriate medications (highest performer)
- Assuring appropriate treatment of Acute Bronchitis (highest performer)
- Appropriate use of imaging for low back pain (highest performer)
Challenges

Building an adequate Provider Network (culture and language)
Low visit rates amongst commercial population – significant impact on RAF and RAT
Member satisfaction (CAHPS)
Sub optimal provider coding and diagnosis capture
Absence of a pay for performance mechanism for Jade providers
Lack of negotiating power in contracting due to small size
Opportunities

Performance below the 25th percentile for the following key measures:

- Breast cancer screening
- Antidepressant medication management
- Access to care
- Care Coordination
- Annual monitoring for patients on persistent medications
- Member satisfaction measures
Covid-19: Members and Providers

Chinese community (especially in Chinatown) – well prepared and adherent to restrictions.
Relatively low incidence of Covid-19
Low admits/1000. Average 2-5 Medicare hospitalizations at any one time. Very few commercial hospitalizations.
Marked decrease in member visits and OP procedures in 2020
CCHP did not provide any PPE
Moderate increase in Telemedicine
  - Slow uptake by Medicare members
CCHP: ON THE HORIZON

New commercial product ("Balance") 2021
New 0$ premium Medicare product 2021
P4P Jade providers
New claims and UM platform
New Quality platform
Strengthening analytics dept.
Beginning process for NCQA cert. (currently URAC certified)
Thank You!

SUCCESS & OPPORTUNITIES

SUCCESS

• Performance above 90th percentile for the following key measures:
  - Antidepressant medication management

• Performance above 90th percentile for the following additional measures:
  - Assuring appropriate medication for patients with diabetes
  - Assuring patients with diabetes are protected against kidney failure
  - Annual monitoring for patients on persistent medication

OPPORTUNITIES

• Performance below the 25th percentile for the following key measures:
  - Engagement of alcohol and other drug abuse treatment
  - Access to care
  - Care coordination

• Performance below the 25th percentile for the following additional measures:
  - Well-child visits in members 3-6 years of age
  - Assuring appropriate treatment for acute bronchitis
RESPONSE TO COVID-19 RESPONSE

- Outreach to high-risk members
- Broad “definition” of COVID-19 diagnosis
- Removal of certain prior authorization requirements
- Prior authorization extension
- Real-time tracking of impacted pharmaceutical agents
- Suspended copays for COVID-19 screening and testing
- Extended grace period
- Removed barriers to discharge
- Utilization Management restructure
- Integration and expansion of the Case Management department
- Provider outreach and support
RESPONSE TO COVID-19
TELEHEALTH UTILIZATION

What is Coronavirus (COVID-19)?

What is COVID-19?

COVID-19 is a novel virus. It’s a world-wide disease that has impacted the world. The health care industry is working hard to help prevent it.

The Coronavirus (COVID-19) is an RNA virus. And like a virus, it can spread in the air through sneeze or coughing. It is also spread through close contact with others.

Where is Coronavirus (COVID-19) spread?

People of all ages can be infected by COVID-19. It is particularly dangerous for older adults and those with pre-existing medical conditions.

People with increased risk of serious complications include the elderly, those with chronic lung diseases, and those with heart disease or diabetes.

Who is at high risk of coronavirus (COVID-19)?

High-risk populations such as those with chronic lung disease, heart disease, diabetes, and those living in crowded conditions, are at a higher risk of coronavirus.

How do people get COVID-19?

We know that people get COVID-19 from close contact with someone who has it. Even though you may think you’re immune to it, the virus can spread through coughing, sneezing, or contact with objects that they have touched. This is why washing your hands regularly is so important.

What are the symptoms of COVID-19? Some people experience cold-like symptoms such as fever, cough, and sore throat. However, some people have no symptoms at all and can still spread the virus.

About 80% of all infections are asymptomatic, meaning people are not aware that they are infected.

How long is someone infected with COVID-19 contagious? People can transmit the virus for about 3 days before symptoms appear. After symptoms appear, people may remain contagious for about 7-10 days.

What is Coronavirus (COVID-19) prevention?

There is no specific cure for Coronavirus (COVID-19). However, there are several measures that can help prevent the spread of the virus:

- Avoid close contact with people who are sick.
- Wash your hands frequently with soap and water for at least 20 seconds.
- Cover your mouth and nose when you cough or sneeze.
- Clean and disinfect frequently touched objects and surfaces.
- Stay home if you feel sick.

UPDATE 03/27/20 Novel Coronavirus (COVID-19) Prevention

Walk-In Appointments at VHP and 12 providers. Here is how to Call 24/7 to Get Help:

In response to the “shelter in place” order, VHP providers are working remotely, so we are unable to take any walk in appointments.
RESPONSE TO COVID-19 PROVIDER OUTREACH
As part of Santa Clara County, VHP is intimately involved with County efforts to combat the spread of COVID-19. This includes:

- VHP, Public Health, and Emergency Operations Center (EOC) joint communication to inform members of test site locations

- VHP staff deployed as Disaster Service Workers (DSWs). Examples of DSW work include:
  - Supporting vulnerable populations in motels and hotels throughout Santa Clara County
  - Supporting the EOC
  - Other DSW nursing work

- VHP staff working as Contact Tracers, helping inform County residents if they have encountered a COVID-19 positive individual

- Fundraising to give back to our community and those directly impacted by COVID-19

- Coordination with Public Health for COVID-19 announcements

- Supporting County’s EOC in providing data in vaccine distribution
VHP
WHAT'S COMING

1. Continuing to build the direct network
2. Improving HEDIS and CAHPS
3. New technology to support Utilization Management and Case Management
4. Continuing to focus on reducing health disparities
5. Continuous efforts to remove barriers in the setting of COVID-19 (transitions of care)
6. Working towards NCQA Accreditation
WESTERN HEALTH ADVANTAGE

Khuram Arif, MD,MBA, Chief Medical Officer
Michele Lehuta, Government Programs Director
Covered CA Board Meeting
January 14, 2021
Western Health Advantage

Presented by: Khuram Arif, M.D., CMO and Michele Lehuta, Government Programs Director
Local health plan. Local service.

Designed to be an alternative to the typical HMO

WHA was created through a coalition of doctors and hospitals in Northern California

Non-profit, public benefit corporation

Mission: We expand access to health care and respond to the changing needs of our members, providers and community to improve the health and well being of all.

Sponsors: Dignity Health | NorthBay Healthcare
Local health plan. Local service.

WHA serves over 100,000 group and individual members in 9 northern CA counties
9,500 Covered CA

Nearly 260 Sacramento-based employees serving the communities where we live and work

“Commendable” NCQA accreditation
A participating plan in Covered CA since 2013

Sponsors: Dignity Health | NorthBay Healthcare
WHA Successes

- NCQA Accreditation – 1 of just 2 “Commendable” plans in CA
- Provider-sponsored, non-profit, integrated delivery system
- Medical groups/hospitals fully capitated for in-network care
- Medical group physicians/operational leads on WHA Quality Committee
- Medical group pharmacists on WHA Pharmacy and Therapeutics Committee
- Virtual visits for medicine and behavioral health have increased rapidly
- COVID-19 related drop for in-person clinic visits has reversed and visit levels are at ~ 65-70% of normal
- 2020 QHP Health Plan Rating Overall = 50th percentile
- 2020 CAHPS NCQA Health Plan Rating Overall = 4 Stars (80th percentile)
Healthcare Innovation in Real Time
Q1 – Q3 2020

WHA Telemedicine Adoption (Medical Visits/Month – Covered CA)

WHA Telemedicine Adoption (Behavioral Visits/Month – Covered CA)

## SERVICE CENTER PERFORMANCE UPDATE

### Comparing December 2020 vs. 2019 Call Statistics

<table>
<thead>
<tr>
<th>Year</th>
<th>Calls to IVR</th>
<th>Calls Offered to SCR</th>
<th>Abandoned %</th>
<th>Calls Handled</th>
<th>ASA</th>
<th>AHT</th>
<th>Service Level %</th>
</tr>
</thead>
<tbody>
<tr>
<td>2020</td>
<td>637,024</td>
<td>411,701</td>
<td>9.33%</td>
<td>369,468</td>
<td>0:05:42</td>
<td>0:19:44</td>
<td>51.44%</td>
</tr>
<tr>
<td>2019</td>
<td>845,509</td>
<td>453,154</td>
<td>21.93%</td>
<td>348,528</td>
<td>0:14:15</td>
<td>0:20:22</td>
<td>18.53%</td>
</tr>
</tbody>
</table>

**Percent Change**

- 25% Decrease for Calls to IVR
- 9% Decrease for Calls Offered to SCR
- 57% Decrease for Abandoned %
- 6% Increase for Calls Handled
- 60% Decrease for ASA
- 3% Decrease for AHT
- 178% Increase for Service Level %

*Time formats (H:MM:SS) are not equal to decimals. Time formats must be converted to decimal before performing calculations. (Example 0:15:45 = 15.75)*

- The total Calls Offered decreased from 2019 by 9%
- Calls Handled increased by 6%
- The Abandoned % decreased by 57%
- Service Level increased by 178%.
### December Consortia Statistics

<tbody>
<tr>
<td>12/1-12/5</td>
<td>12/6-12/12</td>
<td>12/13-12/19</td>
<td>12/20-12/26</td>
<td>12/27-12/31</td>
<td>5,651</td>
</tr>
<tr>
<td>1,152</td>
<td>1,278</td>
<td>1,309</td>
<td>637</td>
<td>1,275</td>
<td></td>
</tr>
</tbody>
</table>

*Partial Week

- **SAWS** = Statewide Automated Welfare System (consortia). California has three SAWS consortia's to provide service to the counties.
- **C-IV** = SAWS Consortium C-IV (pronounced C 4)
- **CalWIN** = California Welfare Information Network
- **LRS** = formally LEADER = Los Angeles Eligibility Automated Determination, Evaluation and Reporting Systems
Quick Sort refers to the calculator tool used to determine if a consumer is eligible for CoveredCA or should be referred to Medi-Cal. The tool also determines which consortia the consumer should be referred. This volume represents the total of those transfers.
CALHEERS UPDATES

CalHEERS last release was implemented December 21, 2020 and included:
- Changes to generate the new State FTB Form 3895 - *California Health Insurance Marketplace Statement* - for consumers to reconcile their state subsidy credit on their state taxes.

CalHEERS Release 21.2 is planned for February 15, 2021 and will include:
- Changes to reduce duplicate case creation by providing notification of an existing case, allows Consumers and Certified Enroller’s to self-delegate to the existing case, which will reduce calls to the Service Center for delegation requests.
- Changes to add/elevate email consent in Account Creation and Application to ensure Consumers are aware that Covered CA may contact Consumers about their current health coverage, other health related communications, and various Covered CA campaigns including completion of account creation by email.
OTHER TECHNOLOGY UPDATES

- Getcovered2021.org website and campaign support
- Deployed COVID-19 screening site for employees
- Salesforce Marketing cloud deployed automated funnel campaigns leveraging CalHEERs data feed
- CoveredCA.com
  - Breaking News Banner
  - Deployed high traffic page for CalHEERS to send consumers when needed
- CiCi (Chatbot)
  - Automatic updates customers when CalHEERS is experiencing high traffic
- Salesforce Service Cloud (Dec Release)
  - Updates contact search for quicker results
  - Implemented FTB integration for reporting of granted exemptions
  - Updated exemption applications in DocuSign and Salesforce
Uncompensated partners supporting enrollment assistance efforts.
